OLIVIA Circulab

Measurement and verification for waste treatment plants and collectors

🌱 Pilot 2026 | Buenos Aires | dMRV · Organics and e-waste

Confidential · Pre-seed round 2026 · hola@oliviacirculab.com.ar

THE STORY

Born in our kitchen

- 👨‍👩‍👦 JP, Mileidy and Santino Eloy: 3 countries, 1 mission
- 🗑️ Every week we threw bags of organic waste into the landfill
- 💡 Why is there no way to prove this can go back into the cycle?
- 🏭 Meetings with cooperatives showed us that certification needs an auditable plant. That is why OLIVIA works with plants first.

THE MISSING PIECE IS VERIFIABLE DATA

The problem

Idle

capacity at Buenos Aires plants and cooperatives

Landfill

where organic waste still ends up, generating methane

No data

no one proves, kilo by kilo, what was diverted and what was treated

No credit

without that data there is no verifiable compliance and no possible certification

TWO CONCRETE ENTRY POINTS. NEITHER WAITS FOR VERRA.

Where this starts in real life

Yerba mate

The easiest organic waste to separate in Argentina: it shows up every day in almost every home, it doesn't drip and barely smells. There is no new habit to teach, only a destination to give the one that already exists. That is the household entry point, not food scraps.

The smell in the stairwell

Methane has no smell. What you smell in the waste room are volatile fatty acids, ammonia and sulfur compounds, released when organic matter decomposes without air. The same conditions that cause the smell produce methane. The smell is the warning of what you can't see.

The only thing you notice in a week

Separating the organic fraction and taking it out often cuts both the smell and the methane. For a building manager, that is the argument that works: not a carbon credit in 2029, but the complaint that stops coming up at the next owners' meeting.

THERE IS MATTER THAT RETURNS TO THE CYCLE. WE MEASURE IT.

In nature, there is no such thing as waste

🌱 Urban autopoiesis

The city as an organism that can regenerate itself. Every verified kilo strengthens the data that proves it.

🏛 Elinor Ostrom · Nobel Prize in Economics 2009

Communities manage common goods better when they have verifiable monitoring. OLIVIA is that monitoring.

♻ Buckminster Fuller

"Pollution is nothing but resources we're not harvesting." OLIVIA measures those resources so they return to the cycle.

SCALE + DIGITAL RECORD + COLLECTOR'S SIGNATURE

The solution

Connected scale

Weight recorded at the plant as each delivery comes in

Digital record and collector's signature

Digital delivery note signed by a licensed collector · the plant confirms treatment

AI verification as the origin layer

Photo + GPS from the generator or the household · Cloudflare Workers AI

Designed to meet Verra requirements

Organics: AMS-III.F · E-waste: AMS-III.BA + VMR0008

RUNNING IN PRODUCTION, WITH NO OUTSIDE INVESTMENT

The product exists today

- ✅ Web app in production · oliviacirculab.com.ar
- ✅ AI waste verification (Cloudflare Workers AI)
- ✅ dMRV dashboard with manual validation
- ✅ Pilot kilos verified, live from the platform
- ✅ Conversations with cooperatives and plants

🚀 **Built with no outside investment · Cloudflare AI + Supabase + Vercel · no external tech team**

THREE REAL STAGES

Roadmap

🌱

SEED · Today ACTIVE

dMRV pilot · software in production · first verified kilos

🌿

SPROUT · Next

Partner plant installed · continuous scale data · collector's signature

🌳

TREE · Certification

Validation by an accredited auditor under the Verra standard · no prices or payment dates committed

⚠️ **Today OLIVIA does not issue carbon credits or promise revenue from them**

THE HOUSEHOLD IS THE ORIGIN LAYER, NOT THE CUSTOMER

Customers · operators first

1 · Plant / Collector	**Data service · B2B**
2 · Large generator	**Consulting + SaaS · B2B**
3 · Residential building	**Monthly SaaS**
4 · Restaurant / Hotel	**Monthly SaaS**
5 · Company (CSR)	**Per project · B2B**
6 · Municipality	**Per contract · B2G**
7 · Citizen	**Origin layer · App**

IN ORDER OF PROXIMITY

Revenue model

01 **Consulting and software for large generators** — **Today**

Lower the cost of the wet fraction and organize compliance

02 **Data service for plants** — **Sprout**

Scale, digital delivery note and traceability of every intake

03 **Carbon credits** — **Tree**

Only after certification

BUILT WITH NO OUTSIDE INVESTMENT

The team

Juan Pablo Sanguinetti de Zapata

CEO & Founder

Chilean theatre director and lawyer. AI product builder. Background in environment, tax and project management. Architect of the Circulab ecosystem from Buenos Aires.

Mileidy Zapata de Sanguinetti

COO & Co-founder

Mother, Dominican dancer and choreographer. One heart, three countries, one mission: building community and improving quality of life. With OLIVIA and Santino Eloy, she started the pilot at home.

🚀 **The whole product built by the founders with AI**

No external tech team · No outside investment · Buenos Aires

PRE-SEED · SAFE WITH VALUATION CAP · FOR AN ACTIVE PARTNER

The ask: USD 75,000 pre-seed, via SAFE

Tranche 1 · USD 75,000

Milestone: company incorporated, collector agreement signed, scale transmitting continuous data

Incorporation and all IP in the company's name (founders' assignment, trademark in Argentina and Chile, software registration, protection of the signing module), collector agreement, 10 type-approved scales, 6 months of team: part-time CTO (fees + vested equity) and founders

Tranche 2 · USD 70,000

Milestone: project design document submitted to Verra

Carbon project developer, baseline, project design document, more nodes

Tranche 3 · USD 80,000

Milestone: project registered

Third-party audit, registration, operations

🏛️ Investor protections

📊 Verified monthly reporting · 🔐 Milestone-based disbursement · 🛡️ Anti-dilution · tag-along rights · ✅ No fixed costs until investment is committed · 📋 Planned registration under Argentina's Knowledge Economy regime

Terms

Post-money SAFE with a **USD 2.5M valuation cap**, negotiable for a lead investor. Tranches 2 and 3 are a non-binding plan; amounts to be confirmed with quotes.

WANT TO BE PART OF IT?

Next steps

- 🤝 Agreement with a licensed collector and scale installed
- 🧪 Carbon project developer hired
- 📄 Project design document submitted to Verra
